1969 ANNUAL INDEX

the tool and manufacturing engineer

SECTION ONE • AUTHOR INDEX • VOLUMES 62 AND 63

—A—

Anderson, J. B. R.—The New Cold Forging Steels. Aug. p. 50

—B—

Bagley, Joseph A.—Putting Plasma to Work in Metalcutting. Oct. p. 20
Bagley, Joseph A.—Selecting a Job Shop for Electron Beam Welding. Aug. p. 40
Banerjee, J. K.—Forces in Surface Grinding with Intermittent Cross-Feed. Jan. p. 63
Banerjee, J. K.—Wheel Wear Pattern in Surface Grinding. Feb. p. 59
Beck, George—Lathe Turning to Two Microinches. Nov. p. 54
Beck, John F.—Rolled Rings—When and How to Use Them. July p. 38
Beck, Walter A.—Explosive Forming: Handling the Parameters. Sept. p. 28
Beck, Walter A.—Explosive Forming: Scaling Down the Costs. July p. 18
Beddows, Norman A.—Accurate Recording of Tape-Winding Tension. June p. 54
Bellows, Guy—Surface Integrity—Its Effect on Product Quality. July p. 54
Biron, Leo J.—Universal Learning Curves—Decision-Making by the Numbers. Oct. p. 62
Bliss, Dana B.—Time Sharing—Powerful Tool for Small Shops. Feb. p. 22
Bond, Robert L.—*Precise Perforations Every Time.* Nov. p. 46
Bryan, James B.—Reduce Thermal Errors in Precision Machining. Mar. p. 38
Butrick, Frank M.—How to Spade-Drill Castings. July p. 44
Butrick, Frank M.—Spade Drilling—How Accurate? Nov. p. 53

—C—

Carlson, Robert E.—Designing Cams for Four-Slides. Aug. p. 24
Carpenter, Richard M.—Consumable Tools—Make or Buy? June p. 44
Centner, Ronald M.—Adaptive Control of Milling Machines. May p. 50

—D—

Dallas, Daniel B.—Another Better Idea from Ford. Sept. p. 38

—F—

Feinberg, Bernard—Ablative Abrasive Boosts Belt Productivity. Feb. p. 18
Feinberg, Bernard—Computer Assisted Programming for N/C Machine Tools. Sept. p. 56
Feinberg, Bernard—Computer Boosts Transfer-Line Efficiency. Oct. p. 14
Feinberg, Bernard—Focus on the Decade Ahead. Aug. p. 45
Feinberg, Bernard—New Use for Induction Heating. Oct. p. 26
Feinberg, Bernard—Quick-React Parts Production. Jan. p. 22
Field, Dr. Michael—Surface Integrity—Its Effect on Product Quality. July p. 54
Frei, John G.—Tooling for Economical Investment Casting. Feb. p. 46
Friend, Jack—Lathe Turning to Two Microinches. Nov. p. 54

—G—

Granger, Lawrence F.—When Machining Seamless Steel Tubing. May p. 26
Grush, L. L.—Control Grain Size to Improve Performance of HSS. Nov. p. 18

—H—

Hausfater, H.—Electrochemical Grinding of Screw Threads. Apr. p. 110
Heiser, Arlan H.—Forming Titanium with Nitrogen. Feb. p. 34
Hillier, M. J.—Forces in Surface Grinding with Intermittent Cross-Feed. Jan. p. 63
Hillier, M. J.—Wheel Wear Pattern in Surface Grinding. Feb. p. 59
Hofer, Peter H.—New Techniques in Stamping Plastics. Oct. p. 50
Hornung, Andor—Slab Milling Efficiency. May p. 59
Hoskins, Mary E.—Microdimensional Instability of Metals. Feb. p. 40
Huber, John—Adaptive Control of Milling Machines. May p. 50
Hulce, R. A.—Cure Coatings with Radiation. Apr. p. 24

—I—

Ingram, A. G.—Microdimensional Instability of Metals. Feb. p. 40

—J—

Jackson, Cletis—STEM Drilling. Sept. p. 44

—K—

Kahles, Dr. John F.—Surface Integrity—Its Effect on Product Quality. July p. 54
Keeler, Stuart P.—Circular Grids Help Solve Stamping Problems. May p. 14

Laufer, Daniel D.—Pressure-Sensitive Adhesive Tapes. Apr. p. 38

—M—

Malloy, John P.—Computers: Big Aids to Small Firms. Oct. p. 54
Manning, E. James—Electrochemical Deburring. Mar. p. 14
Mansfield, F. M.—Zinc Anodize—New Finish for Industry. July p. 14
Meckler, Milton—Response Time Analysis Simplifies Processing of Metal Composites. June p. 59

—N—

Nielsen, John H.—New System for Industrial Waste Disposal. July p. 68

—O—

Olson, Robert D.—STEM Drilling. Sept. p. 44
Osman, Dr. M. O. M.—Crater Wear on Carbide Tools. Mar. p. 67
Ostwald, Dr. Phillip F.—To Buy or Not To Buy?? Dec. p. 42

—P—

Pearson, J. W.—Reduce Thermal Errors in Precision Machining. Mar. p. 38
Peck, Eliot—A Next Generation Computer for Continuous Process Control. Dec. p. 32
Peck, Eliot—N/C at the Eleventh Annual Machine Tool Exposition. Oct. p. 35
Portsmouth, C. Unwin—Blanking Without Dies. Dec. p. 14

—R—

Ratterman, E.—Grinding with Diamond Abrasives. Dec. p. 36
Ready, John F.—Laser Applications in Metalworking. Mar. p. 24
Rolsten, Dr. Robert F.—Electrochemical Deburring. Mar. p. 14

—S—

Scheyer, Gerard—Getting the Most From Cemented Carbide Wear Parts. Dec. p. 22
Shoemaker, R. H.—Clean Surfaces—A Must When Machining Titanium. Aug. p. 36
Sielaff, D. W., Jr.—Preforming—A Cure for Flats. Oct. p. 58
Silvus, H. S., Jr.,—Precise Perforations Every Time. Nov. p. 46
Smith, W. R.—Some Considerations in the Development of Managers. Aug. p. 14
Smith, W. R.—Sime Considerations in the Development of Managers: Part 2. Sept. p. 14
Swanson, Robert K.—Precise Perforations Every Time. Nov. p. 46

—T—

Tavarozzi, A. R.—New Techniques in Stamping Plastics. Oct. p. 50
Trainor, Ray—Coolant Fed Drills—Production Plus. June p. 22
Trucks, Dr. H. E.—Grinding and Heat Treating High-Speed Steels (Part 2). July p. 24
Trucks, Dr. H. E.—How To Determine Minimum-Cost Quantities. Nov. p. 14
Trucks, Dr. H. E.—Planning for Profit. Jan. p. 16
Trucks, Dr. H. E.—Selection and Use of High-Speed Steels. June p. 16

—V—

van der Burgt, J. H.—Metal Stitching—Low Cost Way to Join Thin Metal Parts. May p. 38

—W—

Wachtell, Stanley—Precise Perforations Every Time. Nov. p. 46
Wagerson, G. J.—New Techniques in Stamping Plastics. Oct. p. 50
Waindle, Roger F.—Corrosion—A 10 Billion Dollar Problem. Jan. p. 42
Waindle, Roger F.—Interim Coatings—A Solution to In-Process Corrosion Problems. June p. 28
Weber, I.—Electrochemical Grinding of Screw Threads. Apr. p. 110
Whitmire, Harold D.—Gun Shoots Coatings at Supersonic Speeds. May p. 20

SECTION TWO • SUBJECT INDEX • *VOLUMES 62 AND 63*

ABRASIVE PROCESSING

New Advances in Abrasive Machining. Apr. p. 44

ABRASIVES

Ablative Abrasive Boosts Belt Productivity. Feb. p. 18
Die Grinding with Cubic Boron Nitride. Sept. p. 24

ADAPTIVE CONTROL

Adaptive Control of Milling Machines. May p. 50

ADHESIVES

Adhesives for Honeycomb Structures. Aug. p. 62*
Pressure-Sensitive Adhesive Tapes. Apr. p. 38

ALLOYS

Engineering Materials. Mar. p. 42

ASSEMBLY MACHINES

Automatic Assembly Machines. Feb. p. 68*
Cutting Assembly Costs for Miniature Parts. Aug. p. 22
New Assembly Concept. Apr. p. 13*

AUTOMATIC MACHINERY

New Automatic Chucker Design. Mar. p. 58

AUTOMATION

Boom Manipulator Lends A Hand. July p. 11*
Cutting Assembly Costs for Miniature Parts. Aug. p. 22
Welding Robots. Jan. p. 12*

BORING

Bore Cool—Bore Easy. July p. 67

BRAZING

Fluxless Aluminum Brazing. July p. 13*

CARBIDES

Cemented Carbides. Aug. p. 62*

CARBIDE TOOLS

Crater Wear on Carbide Cutting Tools. Mar. p. 67

CAST IRON

How to Spade-Drill Castings. July p. 44

CENTERLESS GRINDING

Contouring with a Centerless. June p. 13*

CERAMICS

Engineering Materials. Mar. p. 42

CHUCKS

New Automatic Chucker Design. Mar. p. 58
Spider is Finish-Turned in One Chucking. July p. 13*

CLEANING

Clean Surfaces—A Must When Machining Titanium. Aug. p. 36
Vertical Degreaser for Stainless Steel Tubing. Jan. p. 13*

COATING

Gun Shoots Coatings at Supersonic Speeds. May p. 20
Powder Coating. Apr. p. 131*

COATINGS

Ceramic Coating Hardens Seal Diameter of Spindle. Aug. p. 12*
Conversion Coatings. Sept. p. 65*
Cure Coatings with Radiation. Apr. p. 24
Interim Coatings—A Solution to In-Process Corrosion Problems. June p. 28
Protective Coating for Stainless Steel. Jan. p. 14*
Sprayed-Zinc Statistics. Apr. p. 13*
Zinc Anodize—New Finish for Industry. July p. 14

COMPOSITE MATERIALS

Boron/Epoxy Composites. Aug. p. 60*
Solving Welding Problems with Composite Tubing. Sept. p. 53

COMPUTER APPLICATIONS

A Systems Approach to Coordinate Measurements. May p. 56
Computer Boosts Transfer Line Efficiency. Oct. p. 14
Computer Monitors and Controls Operations of Transfer Line. Sept. p. 20
Computers: Big Aids to Small Firms. Oct. p. 54
Computer Service Goes On-Line. Sept. p. 54
Time Sharing—Powerful Tool for Small Shops. Feb. p. 22
Universal Learning Curves—Decision Making by the Numbers. Oct. p. 42

COMPUTER LANGUAGES

Computer Assisted Programming for N/C Machine Tools. Sept. p. 56

COMPUTER PROGRAMMING

Computer Assisted Programming for N/C Machine Tools. Sept. p. 56

COOLANTS

Bore Cool—Bore Easy. July p. 67
Coolant-Fed Drills—Production Plus. June p. 22

CORROSION

Corrosion—A 10 Billion Dollar Problem. Jan. p. 42
Interim Coatings—A Solution to In-Process Corrosion Problems. June p. 28

COST CONTROL

Computers: Big Aids to Small Firms. Oct. p. 54

COST ESTIMATING

Universal Learning Curves—Decision Making by the Numbers. Oct. p. 42

CURING

Cure Coatings with Radiation. Apr. p. 24

DESIGN

Designing Cams for Four-Slides. Aug. p. 24
New Unit Drafts, Programs, Punches Tape, and Inspects Parts. Feb. p. 26
Rolled Rings—When and How to Use Them. July p. 38

DIAMOND WHEELS

For Tough Grinding Jobs. Mar. p. 11*
New Diamonds Grind Carbides Dry. June p. 40

DIE CASTING

Hot Chamber Aluminum Diecasting. Jan. p. 11*
Zinc Anodize—New Finish for Industry. July p. 14

DIE DESIGN

Another Better Idea from Ford. Sept. p. 38
Circular Grids Help Solve Stamping Problems. May p. 14
Circular Grids Warn of Stamping Trouble. Apr. p. 18
Preforming—A Cure for Flats. Oct. p. 58

DIES

Die Grinding with Cubic Boron Nitride. Sept. p. 24

DRILLING

Coolant-Fed Drills—Production Plus. June p. 22
How to Spade-Drill Castings. July p. 44
STEM Drilling. Aug. p. 61*
STEM Drilling. Sept. p. 44

DRILLS

Diamond Micropoint Drills. Jan. p. 11*

ELECTRON BEAM WELDING

Selecting a Job Shop for Electron Beam Welding. Aug. p. 40

ELECTRICAL DISCHARGE MACHINING

EDM for Aircraft Brakes. Apr. p. 14*

ELECTROCHEMICAL GRINDING

Electrochemical Grinding of Screw Threads. Apr. p. 110

ELECTROCHEMICAL MACHINING

Burr-Free Machining Cuts Secondary Operations. Sept. p. 13*
New Solution to an Old Problem. Mar. p. 14
STEM Drilling. Sept. p. 44

ELECTRODES

A Good Point About Tungsten Electrodes. Sept. p. 12*

ELECTROHYDRAULIC FORMING

Electrohydraulic Forming. Mar. p. 80*

ELECTRON BEAM CURING

Cure Coatings with Radiation. Apr. p. 24

ELECTRONICS

Alumina Substrates for Thick-Film Circuits. Apr. p. 132*

ENGINEERING MATERIALS

Control Grain Size to Improve Performance of HHS. Nov. p. 18

EXPANDING

Automatic Expander Sizes Large Pipe Sections. Jan. p. 29

EXPLOSIVE FORMING

Explosive Forming: Handling the Parameters. Sept. p. 28
Explosive Forming: Scaling Down the Costs. July p. 18

EXPLOSIVES

Gun Shoots Coatings at Supersonic Speeds. May p. 20

EXTRUSION

Big Rings from Extrusions. June p. 11*
Hydrostatic Extrusion and Drawing. Jan. p. 69*

FASTENERS

The Stress Pin—New Concept in Fasteners. June p. 36

FIXTURES

"Green Glass" Fixtures. June p. 11*

FLAME CUTTING

Oxygen-Laser Torch: New Tool to Cut Titanium. Oct. p. 18
Putting Plasma to Work in Metalcutting. Oct. p. 20

FLUIDICS

Fluidic Controls for Machine Tools. Aug. p. 60*

FORGING

Autoforging—From Molten Metal to Finished Part on One Machine. May p. 44
Rolled Rings—When and How to Use Them. July p. 38
The New Cold Forging Steels. Aug. p. 50

FORMING

Autoforging—From Molten Metal to Finished Part on One Machine. May p. 44
Blanking Without Dies. Dec. p. 14
Circular Grids Help Solve Stamping Problems. May p. 14
Circular Grids Warn of Stamping Trouble. April p. 18
Forming Titanium with Nitrogen. Feb. p. 34
Hot Spin for Low Cost Tube-End Forming. Dec. p. 18
Preforming—A Cure for Flats. Oct. p. 58
Roll Forming for Profit. Jan. p. 48

FOUR-SLIDE MACHINES

Designing Cams for Four-Slides. Aug. p. 24
Metal Stitching—Low Cost Way to Join Thin Metal Parts. May p. 38

FURNACES

New Resistance Element Heats High-Vacuum Furnace. Aug. p. 13*

GAGES

Gage Attachments Expedite Inspection. June p. 13*

GAGING

Tooling for Economical Investment Casting. Feb. p. 46

GEARS

Augmented Gear Shaper. July p. 11*
Gears in the Seventies. Mar. p. 80*
Giant Right-Angle Drive. May p. 13*
King Size Gear Cutter. Apr. p. 14*

GRINDING

Ablative Abrasive Boosts Belt Productivity. Feb. p. 18
Die Grinding with Cubic Boron Nitride. Sept. p. 24
Forces in Surface Grinding with Intermittent Cross-Feed. Jan. p. 63
Grinding and Heat Treating High-Speed Steels. July p. 24
New Advances in Abrasive Machining. Apr. p. 44
Parameters for Centerless and Surface Grinding (Reference Sheet). Mar. p. 62
Parameters for Internal and Cylindrical Grinding (Reference Sheet). Feb. p. 62
Steel Slab Grinding. Feb. p. 11*
Wheel Wear Pattern in Surface Grinding. Feb. p. 59

GRINDING—DRY

New Diamonds Grind Carbides. June p. 40

HEAT TREATING

Grinding and Heat Treating High-Speed Steels. July p. 24
Response Time Analysis Simplifies Processing of Metal Composites. June p. 59
Stainless Heat-Treat Foil. May p. 11*

HOLOGRAPHY

Holographic Measuring Techniques. Aug. p. 61*

INDUCTION HEATING

New Use for Induction Heating. Oct. p. 26

INJECTION MOLDING

New Clamping System Speeds Up Injection Molding of Large Parts. Mar. p. 48

INSPECTION

A Systems Approach to Coordinate Measurements. May p. 56

INSTRUMENTATION

Microdimensional Instability of Metals. Feb. p. 40

INVENTORY CONTROL

Computer Service Goes On-Line. Sept. p. 54

INVESTMENT CASTING

Improved Investment Casting. Jan. p. 12*
Tooling for Economical Investment Casting. Feb. p. 46

ION BOMBARDMENT

Ion Bombardment Gives Precise Material Removal. Sept. p. 12*

JOINING

Metal Stitching—Low Cost Way to Join Thin Metal Parts. May p. 38
The Stress Pin—New Concept in Fasteners. June p. 36

LASERS

Laser Applications in Metalworking. Mar. p. 24
Laser Balancing. Feb. p. 70*
Laser Beam Application Born. July p. 12*
Lasers for Metalworking. June p. 70*
New Laser Gaging System. Apr. p. 15*
Oxygen-Laser Torch: New Tool to Cut Titanium. Oct. p. 18

LATHES

Automatic Tool Changer—Big Boost for Chucking Lathe Productivity. Apr. p. 54

LUBRICANTS

Lubricant Plating Resists Temperature. Aug. p. 13*

MACHINABILITY

When Machining Seamless Steel Tubing. May p. 26

MACHINABILITY DATA RATINGS

Machinability Ratings for Cold-finished Carbon Steel Bars (Reference Sheet). Apr. p. 118

MACHINE TOOLS

Focus on the Decade Ahead. Aug. p. 45
Machine Tables Cast by the Yard. Aug. p. 11*

MACHINING

Laser Applications in Metalworking. Mar. p. 24

MACHINING DATA

Parameters for Centerless and Surface Grinding (Reference Sheet). Mar. p. 62
Producibility Ratings for Space-Age Materials (Reference Sheet). June p. 64
Producibility Ratings for Space-Age Materials —Part 2 (Reference Sheet). July p. 58

MAGNESIUM

Tool Designs for Machining Magnesium (Reference Sheet). Jan. p. 60

MANAGEMENT

Consumable Tools—Make or Buy? June p. 44
Some Considerations in the Development of Managers. Aug. p. 14
Some Considerations in the Development of Managers: Part 2. Sept. p. 14

MANUFACTURING COSTS

Planning for Profit. Jan. p. 16
Selecting a Job Shop for Electron Beam Welding. Aug. p. 40

MANUFACTURING MANAGEMENT

How To Determine Minimum-Cost Quantities. Nov. p. 14
To Buy or Not To Buy?? Dec. p. 42

MARAGING STEEL

Maraging Steels (Reference Sheet). May p. 66

MATERIAL REMOVAL

EDM—Production Tool? Nov. p. 38
Grinding with Diamond Abrasives. Dec. p. 36
Lathe Turning to Two Microinches. Nov. p. 54
Precise Perforations Every Time. Nov. p. 46
Spade Drilling—How Accurate? Nov. p. 53
Why Variable-Speed D-C Spindle Drives. Nov. p. 24

MEASUREMENT AND MEASURING METHODS

Microdimensional Instability of Metals. Feb. p. 40

MEASURING INSTRUMENTS

Accurate Recording of Tape-Winding Tension. June p. 54

METAL COMPOSITES

Response Time Analysis Simplifies Processing of Metal Composites. June p. 59

MILLING

Adaptive Control of Milling Machines. May p. 50
End Milling Twist Solves Machining Problem. Feb. p. 14
Mammoth Mill Built for Production. Jan. p. 56
Milling Difficult Contours. June p. 12*
Slab Milling Efficiency. May p. 59

MOLDING

Rotational Molding Makes Hollow Plastic Parts. Mar. p. 18

NUMERICAL CONTROL

Computer Assisted Programming for N/C Machine Tools. Sept. p. 56
N/C at the Eleventh European Machine Tool Exposition. Oct. p. 36
New Unit Drafts, Programs, Punches Tape, and Inspects Parts. Feb. p. 26
Open-Loop N/C. Aug. p. 20

NUMERICALLY CONTROLLED MACHINES

Open-Loop N/C Aug. p. 20
Quick-React Parts Production. Jan. p. 22
Vertical N/C Machining Center. Sept. p. 11*

NUMERICALLY CONTROLLED MACHINE TOOLS

Automatic Tool Changer—Big Boost for Chucking Lathe Productivity. Apr. p. 54
Open-Loop N/C. June p. 71*
Total Part Machining Capability. Apr. p. 30

PERSONNEL

Some Considerations in the Development of Managers. Aug. p. 14
Some Considerations in the Development of Managers: Part 2. Sept. p. 14

PIERCING

Another Better Idea from Ford. Sept. p. 38

PIPE

Automatic Expander Sizes Large Pipe Sections. Jan. p. 29

PLASMA ARCS

Putting Plasma to Work in Metalcutting. Oct. p. 20

PLASTICS

Fluorocarbon Plastics. Mar. p. 82*
Machining Thermoplastics. Jan. p. 71*
New Clamping System Speeds Up Injection Molding of Large Parts. Mar. p. 48
New Techniques in Stamping Plastics. Oct. p. 50
Rotational Molding Makes Hollow Plastic Parts. Mar. p. 18

PLASTIC TOOLING

Developments in Plastic Tooling. Mar. p. 79*
Light Weight Materials for Heavy Duty Dies. Jan. p. 38

POLLUTION

New System for Industrial Waste Disposal. July p. 68
Pollution Averted Economically. May p. 11*

PORTABLE TOOLS

Miniature Air Hammer. Mar. p. 12*

POWDER COATINGS

Powder Coating Processes. Mar. p. 83*

POWDER METALLURGY

Engineering Materials. Mar. p. 42
P/M Forms Complex Part. Jan. p. 14*
Properties of P/M Parts. Jan. p. 70*
Testing of Powdered Metal Parts. Jan. p. 69*

PRESSES AND PRESS WORKING

Forming Titanium with Nitrogen. Feb. p. 34
Stamped Ring Ejected by Hydraulic Ram. Sept. p. 11*

PROCESS CONTROL

A Next Generation Computer for Continuous Process Control. Dec. p. 32

PROCESS PLANNING

Planning for Profit. Jan. p. 16

PROPERTIES

Maraging Steels (Reference Sheet). May p. 66

QUALITY CONTROL

Computers: Big Aids to Small Firms. Oct. p. 54
Reduce Thermal Errors in Precision Machining. Mar. p. 38
Surface Integrity—Its Effect on Product Quality. July p. 54

ROLLING

Precision Rolling Mill. Feb. p. 13*
Rolled Rings—When and How to Use Them. July p. 38

SCHEDULING

Universal Learning Curves—Decision Making by the Numbers. Oct. p. 42

SPACE-AGE METALS

Producibility Ratings for Space-Age Materials. June p. 64
Producibility Ratings for Space-Age Materials —Part 2 (Reference Sheet). July p. 58

STAINLESS STEEL

Free-Machining Stainless. May p. 12*

STAMPING

New Techniques in Stamping Plastics. Oct. p. 50

STEEL

Machinability Ratings for Cold-finished Carbon Steel Bars (Reference Sheet). Apr. p. 118
New Use for Induction Heating. Oct. p. 26
The New Cold Forging Steels. Aug. p. 50

SURFACE QUALITY

Surface Integrity—Its Effect on Product Quality. July p. 54

TAPE

Accurate Recording of Tape-Winding Tension. June p. 54
Pressure-Sensitive Adhesive Tapes. Apr. p. 38

TEMPERATURE

Reduce Thermal Errors in Precision Machining. Mar. p. 38

THERMAL PROPERTIES

Reduce Thermal Errors in Precision Machining. Mar. p. 38

THREADING

Electrochemical Grinding of Screw Threads. Apr. p. 110

THREADS

Fatigue of Screw Threads. June p. 70*

TITANIUM

Clean Surfaces—A Must When Machining Titanium. Aug. p. 36
Forming Titanium with Nitrogen. Feb. p. 34
Machining Titanium Alloys. May p. 74*

TOOL COSTS

Consumable Tools—Make or Buy? June p. 44

TOOL DESIGN

Tool Design for Machining Magnesium (Reference Sheet). Jan. p. 60

TOOL ENGINEERING

Crater Wear on Carbide Cutting Tools. Mar. p. 67

TOOL GEOMETRY

Slab Milling Efficiency. May p. 59

TOOLING

Getting the Most From Cemented Carbide Wear Parts. Dec. p. 22
The Economics of Preset Tooling. Aug. p. 11*
Tooling for Economical Investment Casting. Feb. p. 46

TOOL MATERIALS

Selection and Use of High-Speed Steels. June p. 16

TOOL STEELS

Grinding and Heat Treating High-Speed Steels. July p. 24
Selection and Use of High-Speed Steels. June p. 16
Tool Steel Selector. Feb. p. 12*

TRAINING

Some Considerations in the Development of Managers: Part 2. Sept. p. 14
Training with Videotape Recorders. Mar. p. 11*

TRANSFER DIES

Another Better Idea from Ford. Sept. p. 38

TRANSFER LINES

Computer Boosts Transfer Line Efficiency. Oct. p. 14
Computer Monitors and Controls Operation of Transfer Line. Sept. p. 20

TUBING AND TUBE FITTINGS

Tubing for Aircraft Landing Gear. Mar. p. 13
When Machining Seamless Steel Tubing. May p. 26

TURNING

Total Part Machining Capability. Apr. p. 31

WASTE DISPOSAL

New System for Industrial Waste Disposal. July p. 68

WELDING

Laser Applications in Metalworking. Mar. p. 24
Solving a Welding Problem. Mar. p. 12*
Solving Welding Problems with Composite Tubing. Sept. p. 53

*Short article, less than one page.
